PRODUCT DESCRIPTION

What's impressive about the Ledlenser T7.2 is its even, ultra-light beam of light - on the lowest setting it can even last 25 full hours[1]. You can also focus it steplessly, and locking it in place is as easy as pie. Either with your left. Or your right hand. In any case, you only need one. It will therefore never fail you or leave you in the dark.

- Good lighting performance – Up to 320 lumen[1] of luminous flux with up to 260 meters[1] beam distance
- Safe handling – Special, non-slip surface structure and matte Frozen Black coating make the lamp particularly easy to grip
- Optimized operational time – Up to 25 hours[1] in the lowest setting
- From the homogeneous circle of close range lighting (defocused) to a sharply bundled long-distance beam (focused) – The patented[3] Advanced Focus System with reflector lense enables efficient, tailored lighting
- Quick modification of the light cone with just one hand – Rapid Focus with Focus Lock

7 YEAR WARRANTY[4]

PRODUCT SERIES

The Ledlenser T-Series
The best tactic is activation.
The "T" in this flashlight's name stands for "tactical" - although the word "tough" would do just as well. After all we developed this series for tough firefighting, police, rescue, security and technical emergency missions. All T models are therefore extremely robust, very powerful, functional and easy to use. The reason why hunters and anglers value these characteristics so much is just as clear as the shining bright light of the products of the T-series.

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/hrs/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

3) EP Patent 1880139, US Patent 7,461,960

4) Warranty period of five years from the date of purchase, seven years if the product is registered online on our website. The warranty is valid worldwide and legal warranty rights also apply. It covers defects in materials and workmanship. For the proper functioning of rechargeable batteries a different warranty period of 24 months applies. Excluded from this warranty are the product series "Solidline", Ledlenser K1 and Ledlenser K2. The warranty does not apply to Defects in batteries, holsters, pouches, remote switches, color filters, imprints or surface coatings. The guarantor is Ledlenser GmbH & Co. KG, Kronenstr. 5 - 7, 42699 Solingen, Germany. More information: ledlenser.com/warranty
